

Method of Searching a Specific Website by means of a Numerical Code Combined from a Plurality of Specific Phone Numbers

Abstract of the Disclosure

A method for searching a specific website includes the steps of providing an
5 information center which linked to a database for storing website identifiers and a
plurality of corresponding phone codes, wherein the information center is arranged to be
accessed through electronic communication network; receiving a search request from a
user by the information center via the electronic communication network, wherein the
search request includes a numerical search code; searching the numerical search code
10 from the database by matching the search code with the phone codes stored in the
database to form a search result; and providing a search result to the user.
